

FOAM GENERATOR

FOAMMASTER

These are the most advance foam generators produced by our company for foam concrete production. The main components are imported from USA, Germany,UK, ...which guarantee you a long and stable operation.

Two Models

Big capacity FoamMaster II and smaller capacity FoamMaster I to suit your needs.

Support

We will support you on how to successfully operate this product anytime you need.

Experiences

We have exported this product to many countries around the world, such as: India, Argentina, Thailand, Malaysia, Tunisian ...

What makes FoamMaster OUTSTANDING?

- No need for electricity or water pump, fast set up on the job site
- High quality, stable and constant flow of foam
- Easy and safe to operate
- Small in size, light in weight, ultra portable
- The amount of foaming agent can be adjusted easily to help you save costs
- Can be used with all types of foaming agents available on the market

Pneumatic timer

Both FoamMaster machines are equipped with a pneumatic timer which allows you to preset the spraying time and get consistant quantity of foam every time.

After each spraying cycle, the timer will reset automatically. Just push the ON/OFF button on the right side again and you will have the next spraying cycle with the same quantity of foam.
